Outstanding Print Quality

CSA Balloons advanced printing technology produces the best and largest logo imprint on the market. Their proprietary printing process allows them to print any image on balloons, and they print quickly all the while

maintaining a flawless quality.

Unmatched Print Size

Their printing machines allow them to cover more balloon printing area than other printers on the market and they can even print on larger size balloons, including the popular 36-inch balloons.

Impeccable Colour-Match

CSA Balloons uses the Pantone Colour System to ensure business logos are matched impeccably. For more intricate reproductions, they can also use 8-colour CMYK Printing.

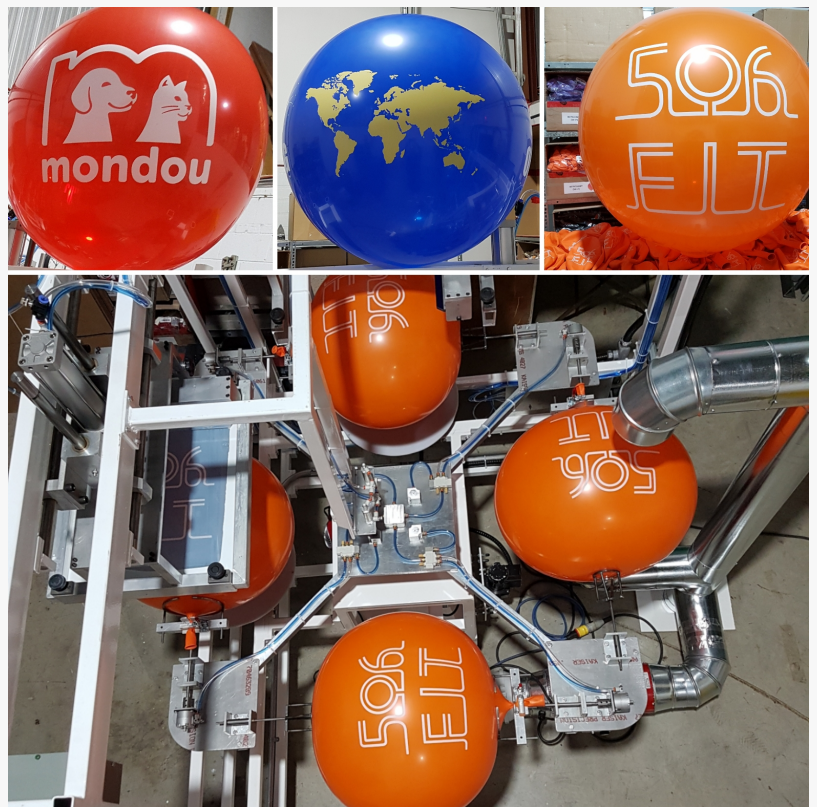

CMYK Printing is a process in which the image is separated into 4 different colours (cyan, magenta, yellow and black) and sequentially printed in dots and by colour, to reproduce the original image. The 8-colour printing process adds 4 additional light colours to the plate, which means that more printed dots are generated, therefore creating a higher resolution and finer, more vivid, crisp, and lifelike images.

Custom Balloon Decorating in Canada

CSA Balloons also offers balloon decorating services in most major cities in Canada. Through their extensive channel of Certified Balloon Artists (CBAs), CSA Balloons offers all sorts of decorating options, from balloon set-up services to more intricate balloon arches and columns. Custom balloons must be included in décor plans.
