

Fidia Remains Market Leader as Medtronic Trails Behind: Stringent Regulations in the EU Orthopedic Biomaterials Market

VANCOUVER, BRITISH COLUMBIA,
CANADA , May 30, 2022

/EINPresswire.com/ -- iData Research, a global consulting and market research firm, has just released exclusive research on the European orthopedic biomaterials market, addressing key insights and consequences of COVID-19 in 2021, 2022, and beyond. One major limiter

“

Orthopedic hyaluronic acid viscosupplementation continues to be the largest market in Europe, and it is expected to increase steadily to exceed its market value before the pandemic.”

*Dr. Kamran Zamanian, Senior
Partner and CEO*

influencing nearly all segments within the 15 European orthopedic biomaterials markets is stringent regulations and lengthy health assessment processes. In Europe, medical devices must undergo a strict conformity assessment to demonstrate that they meet the legal requirements ensuring they are safe and effective.

According to iData's [European Market Report for Orthopedic Biomaterials](#), the market was valued at €550 million in 2021. This is expected to increase over the forecast period to reach \$632 million by 2028. This report includes procedure numbers by indication, unit sales,

average selling prices, market drivers and limiters, competitive market share analysis, and more.

iData's analysis includes detailed segmentation on the following markets including bone graft substitutes, which are represented by allografts, demineralized bone matrix (DBM) and synthetic bone grafts. The report also includes orthopedic growth factors, cell therapies, hyaluronic acid (HA) viscosupplementation and cartilage repair.

Among the many competitors in the orthopedic biomaterials market, Fidria and Medtronic are the top two market share leaders. Fidria retained its spot as the leader within the European orthopedic biomaterials market. This is due to its orthopedic HA viscosupplementation products, Hyalubrix® and Hyalgan®, which maintains a strong presence in the market.

To accurately estimate market shares, units sold, average selling prices, product segments, and brands as well as procedural volumes, iData Research uses its proprietary market and procedure

databases, as well as hospital purchase order data to complement its primary and secondary research initiatives.
