

Energy Industry Veteran Carl Almeter Joins ikeGPS as Vice President of Utility Sales

IKE continues its investment in the electric utility market by hiring a proven business leader.

BROOMFIELD, COLORADO, UNITED STATES, June 1, 2022 /EINPresswire.com/ -- ikeGPS, the leading provider of outside plant infrastructure data acquisition and analysis tools for electric utilities in the US, today announced that Carl Almeter has joined the company and will serve as Vice President of Utility Sales.

Mr. Almeter brings over thirty years of energy industry experience to ikeGPS, most recently as the Director of Business Development for Burns & McDonnell, where he provided grid modernization, digital transformation, power delivery, and energy management advisory services and solutions to electric utility clients.

Previously, Mr. Almeter was a Vice President at CPower Energy Management and the President of Demand Response Partners, Inc., where he was a member of their executive leadership and ownership teams.

The hiring comes as ikeGPS looks to expand its industry-leading suite of enabling technologies that help electric utilities acquire and analyze data to secure, maintain, and improve their outside plant infrastructure, which includes utility poles, power lines, and ancillary attached equipment.

Excited about his new role, Mr. Almeter said, "It's an exciting time to join ikeGPS and help electric utilities deploy industry-leading power delivery infrastructure measurement and inspection technologies and solutions. Today, utilities are looking for advanced technologies, including artificial intelligence-based grid inspection platforms, to assist them with accelerating their grid hardening, grid modernization, resiliency, reliability and digital transformation initiatives. IKE's suite of tools has earned a great reputation in the industry. It's an honor to be leading this team of professionals whose mission is to get IKE's solutions in the hands of the utilities tasked with maintaining and evolving our nation's electrical grid and information highway."

ikeGPS's Senior Vice President, Chris DeJohn, said of Mr. Almeter's hiring, "We are excited to have Carl join our team. As we continue to invest in the utility market, we feel Carl's industry experience and contributions will provide the go-to-market effort that complements the technology and processes IKE provides to our customers. With Carl, we have a sales leader to execute on helping electric utilities gather and analyze the data for everything from defendable

pole load analysis software to providing a digital twin as utilities go through grid modernization of their outside plant.”
