The gluten free food market consists of sales of gluten free food items and related services. Gluten is a group of proteins found in various grains including barley, wheat, and rye. The gluten free food items are consumed mostly by people with celiac disease or are allergic to gluten. Gluten free food comprises fruit & vegetable, meat, fish, potatoes, rice, lentils, and others. The benefits associated with the consumption of gluten free food includes weight loss, increased energy, and improved health.

## [Global Gluten Free Food Market Trends](#)

The need for gluten free products is driving innovation across food industry, especially in bakery sector. For instance, Veripan, a specialist in food products, announced the launch of “breakthrough” all-purpose flour mix for gluten-free bakery. This is a completely natural solution discovered to create gluten free bakery products while avoiding crumbly textures, dryness, and off-flavors. This scenario is to provide ample of growth opportunities for manufacturers for expansion in the global market.
