The air cargo transport services market consists of sales of air cargo transport services and related goods by entities (organizations, sole traders, and partnerships) that use aircraft, such as airplanes and helicopters to provide air transportation of cargo and mail on a contract basis over fixed international routes.

[Global Air Cargo Services Market Trends](#)

Companies are increasingly using blockchain technology to improve efficiency, minimize losses, and prevent damage to cargo, shaping the air cargo services market outlook. Blockchain technology allows air cargo companies to digitally track and record the change of custody for airline cargo containers, or Unit Load Devices (ULDs), as they journey between destinations. For instance, the blockchain in Transport Alliance (BiTA) is pushing for a standardized implementation in the logistics industry. Large industry players such as UPS, FedEx, DHL, and Union Pacific have signed on with BiTA. Sita, an air transport communications and information technology company estimates the possibility of using blockchain technology to save \$400M a year for the air cargo industry.

Global Air Cargo Services Market Segments

The global air cargo services market report is segmented:

By Type: Air Mail, Air Freight

By Destination: Domestic, International
