*The Business Research Company's
Hardware Support Services Global Market
Report 2022: Market Size, Trends, And
Forecast To 2026*

LONDON, GREATER LONDON, UK, June
2, 2022 /EINPresswire.com/ --

According to 'Hardware Support
Services Global Market Report 2022 –
Market Size, Trends, And Global
Forecast 2022-2026' published by The

Business Research Company, the global [hardware support services market size](#) is expected to grow from \$912.82 billion in 2021 to \$1,035.10 billion in 2022 at a compound annual growth rate (CAGR) of 13.4%. The growth in the market is mainly due to the companies rearranging their operations and recovering from the COVID-19 impact, which had earlier led to restrictive containment measures involving social distancing, remote working, and the closure of commercial activities that resulted in operational challenges. As per TBRC's hardware support services market research the market is expected to reach \$1,636.36 billion in 2026 at a CAGR of 12.1%. Governments around the world are investing in the creation of smart cities; this is expected to drive the demand for computer hardware products and subsequently hardware support services market during the forecast period.

it eliminated the need for physical storage space required to deploy the software. The cloud is a software delivery method where a vendor hosts a software application in a remote server and customers can access it through the internet. As cloud computing services continue to grow, the demand for cloud data recovery solutions is gathering pace. Disaster recovery tools are particularly needed because the cloud stores data which is prone to cyber and malware attacks.
