The rail freight market consists of sales of rail freight transportation services and related goods by entities (organizations, sole traders, and partnerships) that provide the carriage of goods from a point of loading, or goods station, to a point of unloading, again a station capable of handling the loading and unloading of the goods carried. These goods are generally heavy in bulk and of low value with their bulk.

## Global Rail Freight Market Trends

Tracking and tracing systems of rail freight using GPS and GSM helps the transportation organizations to overcome the rail freight transportation drawbacks such as loss and theft. It provides full-fledged security and monetarization of freights and more effective and efficient freight transportation over short distances for smaller loads.

## [Global Rail Freight Market Segments](#)

The global rail freight market is segmented:
