The couriers and messengers market consists of sales of courier and messenger services and related goods by entities (organizations, sole traders, and partnerships) that provide tracked, guaranteed, and express delivery services of parcels within intercity, local, and/or international geographies without operating under a universal service obligation. The industry includes the establishments that provide sorting and transportation activities of parcels. The industry also includes establishments that provide local messengers which usually deliver the parcels within a metropolitan or single urban area and mostly use bicycles, on-foot, small trucks, or vans.

[Global Couriers And Messengers Market Trends](#)

Couriers and messengers market trends include increasingly using automated parcel terminals. According to the couriers and messengers market overview, automated parcel terminals are computer-controlled units that allow customers to collect, hand in, and return parcels around the clock. These terminals are deployed at locations with maximum footfall such as walkways, convention centers, grocery outlets, shopping malls, convenient stores, gas stations, and railway stations. These terminals improve the quality of the delivery services network and reduce last-mile delivery management costs for the company. Automated parcel terminals are being extensively used in Europe and the global market for automated parcel delivery terminals is

expected to reach \$ 1.06 billion by 2025, thus indicating a significant potential for these automated systems.
