The passenger air transport services market consists of sales of passenger air transportation services and related goods by entities (organizations, sole traders, and partnerships) that use aircraft, such as airplanes and helicopters to provide air transportation services for passengers. It includes services offered by both scheduled and nonscheduled air carriers.

Global [Passenger Air Transport Market Trends](#)

The use of analytics is rapidly growing in the aviation industry to capture critical insights from customers and operations data. According to the global passenger rail transport market analysis, it allows airlines to offer personalized services to their customers by using data analytics tools at every customer touchpoint. The growing use of analytics in the aviation industry is mainly a result of increasing competition between airlines. As a result, the commercial airline is looking to enhance customer satisfaction levels by analyzing parameters such as ticket sales passenger profile and purchase history. For instance, Chicago-based United Airlines analyses 150 variables in a customer profile to offer a more personalized offer. Major companies using analytics in the aviation industry are Southwest Airlines, Delta Airlines, and United Airlines.

Global Passenger Air Transport Market Segments

The global passenger air transport market is segmented:
