The global commuter rail and public bus services market consists of sales of commuter rail and public bus services and related goods by entities (organizations, sole traders, and partnerships) that operate local and suburban ground passenger transit systems using more than one mode of transport over regular routes and on regular schedules within a metropolitan area and its adjacent nonurban areas. Commuter rail is usually characterized by reduced fares, multiple rides, and commutation tickets, and is mostly used by passengers during the morning and evening peak periods.

## [Global Commuter Rail And Public Bus Services Market Trends](#)

Many bus service providers are introducing hybrid buses to reduce carbon emissions. Buses are generally powered using diesel which releases CO2 emissions to the environment. On the contrary, hybrid buses utilize alternate fuel and do not require heavy investment like electric
