The Decentralized Finance Platforms Market report provides significant important data of the business sphere through an elaborate evaluation of the market. The report sheds light on the growth prospects and growth driving factors that are likely to influence the market growth and propel the market to be extremely profitable over the coming years. The report also assesses the challenges and restraining factors anticipated to hinder the growth of the market over the

forecast timeline.

The product landscape of the Decentralized Finance Platforms market includes the product range, which can be categorized into

Component Outlook (Revenue, USD Billion; 2018–2028)

Blockchain Technology

Decentralized Applications (dApps)

Smart Contracts

Application Outlook (Revenue, USD Billion; 2018–2028)

Assets Tokenization

Compliance & Identity

Marketplaces & Liquidity

Payments

Data & Analytics

Decentralized Exchanges

Prediction industry

Stablecoins

Others

The section covers the analysis of the market share and revenue generated by each product and offers insights into the segment exhibiting promising growth over the projected timeline. The report provides extensive coverage of the application spectrum of the Decentralized Finance Platforms market and offers information regarding the market share and demand of each application.

Some Key Highlights in the Report

In December 2020, TrustToken launched DeFi lending protocol, TrueFi, allowing users to generate stable, high returns, and enable approved borrowers with quick, fixed-term, and fixed-rate with no collaterals. The platform recorded USD 35 million in the total value locked (TVL) within 24 hours of going live. TrueFi is already being used by Alameda Research, which is a quantitative crypto trading firm that operates in crypto derivatives exchange FTX.

The data & analytics segment accounted for a significant revenue share in 2020. DeFi protocols provide a unique advantage for data analysis as well as decision-making regarding risk management and financial opportunities due to their transparency in data and network activities. Rapid increase in DeFi applications has led to the development of several dashboards and tools that help users compare yield and liquidity and assess platform risk.

The smart contract segment accounted for a significant revenue share in 2020 as it is the backbone of DeFi protocols and applications. Smart contracts refer to applications stored in blockchain and have access to financial institutions. Smart contracts act as custodians of digital transactions with customized criteria for details regarding when, how, and to whom these assets can be released.
