Dragon Guild just got better.

CHARLESTOWN, NEVIS, ST KITTS AND NEVIS, June 4, 2022 /EINPresswire.com/ -- Dragon Guild just got better.

Heard about the \$750 mint price, Its now cheaper for the Dragon Guild community and with the new partnership made with Cyber Apes Yacht Club, It's already achieved two great accomplishments:

Able to do it better
Able to do it cheaper, let's explain how.

Dragon Guild has never been a standard NFT project, utility from day one, secured a plot of land in TCG for every NFT. Since TCG has not launched their alpha yet, it will not give the instant utility right away. The land is secured and will be available on the second mint along with all the other cool stuff. New absolutely amazing utility has been added that will start making money for Dragon Guild the very first week.

This is the pre-mint roadmap for Dragon Guild. It is a bit complicated, the work put into it has not only added great value and utility to the community,

but also will do it at a cheaper price than was initially

The Guild must come First

Dragon Handlers

possible.

So, now you are probably wondering, how will this be cheaper than what we originally said? Not only adding a bunch of utility that is far better than most other projects alone, but also added a new collection of NFTs. Well, that is where it gets interesting.

As mentioned earlier, TCG is not in alpha yet so it is not ready, and if this was the only utility the mint would wait. The Cyber Apes Yacht Club is ready. The last piece of the puzzle is in place and this opens up possibilities never thought possible. Alone strong, together, unstoppable.

How unstoppable? Well, the original plan for mint cost was \$750. The extra utility would bring this mint up to well over \$1000 if done all together. Now, The community deserves to reap the rewards.

This mint will be \$375. Half of price of prior mint, to stack up a few extra, and hold on for dear life.

Holding a Dragon Guild NFT, the second mint will be free. Is this a mistake? No, Dragon Guild is adding a second NFT Collection and a plot of land currently worth between 1 and 12 BNB. Let's break this down:

- 1 Female NFT
- 1 Male NFT

- TCG land plot linked
- Endless actual utility and fun.

The community comes first and now the total cost will be ... \$375.

How is this possible? Well, the first collection is so powerful with its utility, even from day one, the project will make enough money to pay for itself and then some in a matter of a few months. More NFTs, more utility, for less money. This is what the Dragon Guild is about. Giving back to the community in every way possible, that is what the Guild is built on, and how it will keep building. This project in the short term is full of utility, but in the long term endless possibilities will become available.

In the beginning, this will mean building the project stronger and more powerful, doing things people can't even imagine, and laying groundwork for long term growth and viability. While at the same time showing the community holding a Dragon Guild NFT is not only being part of something that will put its firm grip on the future of web3, but also that it is very rewarding to be a part of it. Random airdrops can happen at any time.
