The general freight trucking market consists of sales of general freight trucking services and related goods by entities (organizations, sole traders, and partnerships) that provide general freight trucking services. Establishments in the general freight trucking industry handle a wide variety of commodities, generally palletized, and transported in a container or van trailer. They also provide network activities such as local pickup, local sorting, and terminal operations, line hauling, destination sorting and terminal operations, and local delivery.

Global [General Freight Trucking Market Trends](#)

With the entry of automated vehicles with high-tech safety measures, cameras, radar, and Lidar sensors guiding the way, companies can save money through less fuel and more frequent schedules, shaping the general freight trucking market outlook.
