

Appspan to Attend at Oracle User Group Conferences as New Combined Entity with GRC/Access Orchestration Leader, Pathlock

Appspan (a Pathlock company) is the Elite Sponsors and presenters at Oracle Conferences in June, including Blueprint 4D, Ascend '22 and Interact 2022

DALLAS, TX, US, June 6, 2022 /EINPresswire.com/ -- Appspan (now a Pathlock Company) an ERP security leader, is pleased to announce they will be re-branding as Pathlock and appearing as Elite Sponsors at [Blueprint 4D](#) (Quest Oracle User Group), [Ascend '22](#) (OATUG & OHUG), and [Interact](#) (HIUG.) The merger with Pathlock was announced in May of 2022 and is designed to help enterprises that use leading ERP solutions like Oracle, PeopleSoft, JD Edwards, and SAP streamline and strengthen their business risk management and data protection strategies.

"Traditionally, organizations are auditing the controls for their applications and data with a patchwork of manual processes, disparate software tools, and consulting and services organizations. The combined company from this merger creates a first-of-its-kind, unified, 360-degree platform. Now, organizations can automate their controls across their business applications and mitigate risk in real time. It is a simplified way for enterprises to protect their data in the face of digital transformation and the cloud era." said Piyush Pandey, former CEO of Appspan and new CEO of Pathlock.'

The combined company is now servicing over 1,200 customers across all major industries and will double in size in terms of employees. Additionally, the new company brings with it a global reach and international customer presence with offices across the United States, Belgium, the UK, Germany, Israel, and India.

"For many years, Appspan has had a fantastic relationship with the Quest Oracle User Community, Oracle Applications & Technology Users Group (OATUG), Oracle HCM User Group (OHUG), and the Healthcare Industry User Group (HIUG). Having the opportunity to re-brand and present/demonstrate our additional offerings, made possible by our merger with Pathlock, is very exciting," said Scott Lavery, former VP of Marketing of Appspan and now VP of Growth at Pathlock.

Official Conference Activities:

About Appspan:

Appspan provides comprehensive data security and compliance solutions for ERP applications such as SAP and Oracle. The Appspan Security Platform is designed to manage and mitigate the myriad of risks associated with ERP data, including hacking, fraud, theft, and business process

errors. Using a suite of sophisticated solutions, including dynamic access controls, data security, and user activity & transaction monitoring, Appian enables organizations to strengthen how their systems and data are accessed while gaining deep visibility into behavior around data access and usage. With Appian, organizations can be prepared to combat today's modern security and compliance threats without drastically overhauling their existing systems or incurring change management.

About Pathlock:

Pathlock brings simplicity to customers who are facing the security, risk, and compliance complexities of a digitally transformed organization. Pathlock provides a single platform to unify access governance, automate audit and compliance processes, and fortify application security. With integration to 140+ applications and counting, Pathlock customers can confidently handle the security and compliance requirements in their core ERP and beyond.
