The global sports medicine market. report covers the analysis of drivers, trends, limitations, restraints, and challenges arising in the sports medicine market. The report also discusses the impact of various other market factors affecting the growth of the market across various segments and regions. The report segments the market on the basis of types, applications, and regions to impart a better understanding of the sports medicine market.

Some Key Highlights from the Report

The body support and recovery product segment are expected to grow significantly due to the requirement of products such as braces, physiotherapy equipment, and support required for reconstruction. The demand for the product is growing due to the increase in the number of surgeries.

The knee injuries segment growth is attributed to the increase in the number of injuries in the major sports. The segment held the largest market share in the application segment.

An increase in the incidence of cardiac arrest and heart issues is increasing the demand for cardiac monitoring and evaluation devices. These devices are used to monitor myocardial infarction, arrhythmia, and QT-interval monitoring.

Asia-Pacific regional segment of the market is expected to remain the highest growing segment during 2020-2027, at a CAGR 5.9% owing to increased initiatives taken for physical fitness by individual and funding provided by the government organizations.
