companies rearranging their operations and recovering from the COVID-19 impact, which had earlier led to restrictive containment measures involving social distancing, remote working, and the closure of commercial activities that resulted in operational challenges. The SCM software market size is expected to reach $59.93 billion in 2026 at a CAGR of 18.1%. The need for companies to remain relevant in the market amidst the highly competitive conditions is a crucial driver for the SCM software market growth.
