The power bank market consists of sales of power banks and related services. A power bank or a portable charger enables a user to charge their smartphones, laptop, tablet, and other media devices with a USB-enabled connection. These power banks can be reused multiple times by simply recharging them. There are various types of power banks available in the market which include, standard power banks which can be charged using a normal USB port, and solar power banks which use sunlight to charge up and contain photovoltaic panels.

Global Power Bank Market Trends

Wireless power banks are key emerging trend in the field of power bank market which have a potential for expansion in the future. According to the power bank market overview, this will enable people to charge their electronic devices from anywhere with excellent touchless experience. These types of power banks provide faster charging and multiple charging options. The user does not have to take the pain of carrying an extra cable and plugging it in. Many of the brands like Samsung, Xiaomi, Ambrane, and other brands have already started investing in manufacturing wireless chargers for different types of smartphones. In March 2020, Xiaomi, the
