

# Active World Club Lists New Carbon Credits Crypto Currency Token Carbon Coin

*Club to establish New Carbon Credits  
Exchange*

PHILADELPHIA, PA, USA, June 7, 2022 /EINPresswire.com/ -- [Active World Club](#),  
([www.ActiveWorldClub.com](http://www.ActiveWorldClub.com)) a leading decentralized crypto currency club and trading exchange

“

The goal of Carbon Coin and the new carbon credits exchange is to become the standard trading platform and currency for the buying and selling of carbon credits in the US”

*Carbon Coin founder John  
Bunszel*

is pleased to announce the listing of the new carbon credits token, [Carbon Coin](#) on its VIP crypto currency exchange [www.MadHatter.Exchange](http://www.MadHatter.Exchange). The Club also announced its intent to launch a [new exchange](#) that will allow for the buying and selling of carbon credits.

Carbon Coin – The new token is a crypto currency that will be used to buy and sell carbon credits on the exchange. Carbon credits are tradable certificates that give the holder the right to emit, over a certain period of time, carbon dioxide or other greenhouse gases. The certificate, or credit, can then be minted into an NFT and purchased

using the new Carbon Coin token on the exchange.

Carbon Coin founder John Bunszel stated, “The goal of Carbon Coin and the new carbon credits exchange is to become the standard trading platform and currency for the buying and selling of carbon credits in the US.” He went on to say, “Creating a new cryptocurrency based market place for the trading of carbon credits can play an important role in unlocking new financial opportunities while lowering overall carbon emissions. For example, farms that create carbon credits would be able to monetize those credits on the exchange by selling them to businesses that need additional credits to lower their carbon footprint. The Carbon Coin and carbon credits marketplace will create a new, safe ecosystem to facilitate these types of transactions.”

Voluntary Carbon Markets or VCM's topped \$1 Billion in 2021. Industry experts have estimated the carbon markets could reach \$4 trillion by 2050. The year 2050 is also the timeline provided by the Paris agreement for the world to achieve net-zero emissions.

The Task Force on Scaling Voluntary Carbon Markets, a group of more than 200 experts, consultants and NGO's released a report that stated, large-scale voluntary carbon markets

(VCM's) are critical to reaching the goals of the Paris Agreement – they will enable more companies to turn net-zero commitments into action. The report summary stated, VCM's need to grow by 15X by 2030 in order to reach the goals of the Paris agreement by 2050.

AWC COO, Beau Kelley added, “Most, if not all of our daily activities have some impact on our carbon footprint. Individuals and businesses are either producing carbon or generating credits based on their activities. The future potential for Carbon Coin and the carbon credits market is so massive it’s almost hard to place a value on it.”

#### About Carbon Coin

The Carbon Coin is new crypto currency used to buy and sell Carbon Credits on a decentralized private exchange. Currently there is a lack of Exchanges and/or Crypto Currencies for utilization of Carbon Credits to benefit local farmers, agricultural land owners, as well as large Corporations. Our goal is to be recognized by the industry leaders and/or government as the main Crypto Exchange and Currency of the Fast growing Clean Earth initiative. For additional information please visit [www.ActiveWorldClub.com/carbon](http://www.ActiveWorldClub.com/carbon).

The Carbon Coin Token

## SAFE HARBOR STATEMENT:

This press release contains forward-looking statements that can be identified by terminology such as "believes," "expects," "potential," "plans," "suggests," "may," "should," "could," "intends," or similar expressions. Many forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause actual results to be materially different from any future results implied by such statements. These factors include, but are not limited to, our ability to continue to enhance our products and systems to address industry changes, our ability to expand our customer base and retain existing customers, our ability to effectively compete in our market segment, the lack of public information on our company, our ability to raise sufficient capital to fund our business, operations, our ability to continue as a going concern, and a limited public market for our common stock, among other risks. Many factors are difficult to predict accurately and are generally beyond the company's control. Forward-looking statements speak only as to the date they are made, and we do not undertake to update forward-looking statements to reflect circumstances or events that occur after the date the forward-looking statements are made.
