Knee Osteoarthritis Market Dynamics

Drivers

Increasing prevalence of osteoarthritis

The rising prevalence of osteoarthritis is estimated to enhance the knee osteoarthritis market's growth. Injury, obesity, and a variety of other factors contribute to osteoarthritis. The damaged bodily part has severe joint pain and stiffness. Swelling of joints, tingling in the legs and limbs, and a reduction in range of motion are all indications of osteoarthritis.

Increasing investment for healthcare infrastructure

Another significant factor influencing the growth rate of the knee osteoarthritis market is the rising healthcare expenditure which helps in improving its infrastructure. Also, various government organizations aims to improve the healthcare infrastructure by increasing funding and this will further influence the market dynamics.

Growing number of geriatric population

The surging geriatric population is estimated to enhance the market's expansion during the forecast period of 2022-2029. According to the World Health Organization (WHO), the worldwide geriatric population, which was estimated to be over 524 million in 2010, is expected to increase to nearly 2 billion by 2050. Due to their compromised immune systems, geriatrics are more susceptible to knee osteoarthritis, further estimated to enhance the market's growth rate.

COVID-19 Impact on Knee Osteoarthritis Market

Over the projected period, the knee osteoarthritis market was expected to be constrained by the COVID-19 outbreak. Since its emergence in December 2019, the COVID-19 virus has spread to nearly every country on the planet, prompting the World Health Organization (WHO) to declare it a public health emergency. COVID-19, a new coronavirus, was identified as the causal agent in the pneumonia cases. This virus spread quickly over the world, killing a large number of people. COVID-19 was labelled a global pandemic by the World Health Organization (WHO) in March 2020, and rigorous measures to prevent the disease's spread were recommended. Since then, the pandemic has delayed the expansion of the healthcare sector and disrupted the supply chain. Furthermore, governments in many nations had imposed nationwide lockdowns to halt the spread of COVID-19. Similarly, healthcare organizations in numerous nations throughout the world were having difficulty continuing their supply chain activities. The supply chain slowness hampered the knee osteoarthritis market.
