### [Europe CBD Patch Market: Overview](#)

CBD patches are transdermal patches containing cannabidiol (CBD). They slowly release CBD into the bloodstream through the skin. Some people may prefer this CBD delivery system to inhaling vaporized CBD or ingesting it orally via edibles or drinks. CBD patches may be a more suitable option for certain applications, such as treating pain, although personal preference will play a role in choosing the best way to take CBD. This transdermal method delivers the CBD quickly to the local area around the patch. From there, it works its way into the bloodstream. When people take CBD orally - via an oil or gummy, for example - the compound must first pass through the digestive system. The body may then use it, break it down, or even simply excrete it as waste. As such, much of an oral CBD dose may be lost in the digestive system.

The rising use of CBD patches with consumer awareness is the major driving factor in the market. The side effects associated with CBD and THC can prove to be a challenge however the

widening of research scope for medical applications of CBD patches prove to be an opportunity. The restraints by the government and medical bodies for the use of CBD for medical applications and the challenges faced due to the impact of Covid-19 on the supply chain of the raw materials are the restraining factors.

Benefits of the Europe CBD Patch Market:

Analysis of the changing competitive dynamics of the industry and understanding the attractiveness quotient of various products/solutions/technologies in the Europe CBD Patch Market.

Futuristic outlook on factors driving and restraining the growth of the market

An in-depth 8-year forecast along with predictions of market growth

Comprehensive analysis of the key product segments and their growth estimation for easy understanding

Provides a competitive edge to the companies operating in the market

Strategic recommendations to the established companies as well as new entrants in the industry

In-depth analysis of market segments and complete insights of the market to assist in formulating investment strategies

Europe CBD Patch Market Scope and Market Size

Europe CBD Patch market is segmented on the based on the product, species, packaging, dosage, derivative, application, source type, end user and distribution channel. The growth among segments helps you analyse niche pockets of growth and strategies to approach the market and determine your core application areas and the difference in your target markets.

On the basis of product, the CBD Patch market is segmented into reservoir, matrix and layer drug-in-adhesive. In 2021, reservoir segment is dominating the CBD Patch market due to its use in varied CBD applications and its steady and controlled release for longer period of time.

On the basis of species, the CBD Patch market is segmented into cannabis indica, hybrid and sativa. In 2021, Cannabis Indica segment is dominating the CBD Patch market due to its high CBD and low THC percentage as compared to sativa and hybrid. As many regions have a limit in the use of THC in products, Cannabis Indica is preferred.

On the basis of packaging, the CBD Patch market is segmented into two to five patches, single patch and more than five patch. In 2021, two to five patches segment is dominating the CBD Patch market due to its high availability and the discounts offered by manufacturers on a bundle of patches in this range.

On the basis of dosage, the CBD Patch market is segmented into below 30 mg, 30-40 mg, 40-50 mg and above 50 mg. In 2021, below 30 mg segment is dominating the CBD Patch market as the market is at its initial stages and new consumers start with low dosage and then increase as per the requirement.

On the basis of derivatives, the CBD Patch market is segmented into cannabidiol (CBD), tetrahydrocannabinol (THC) Others. In 2021, cannabidiol (CBD) segment is dominating the CBD Patch market owing to the restrictions on the tetrahydrocannabinol (THC) content of 0.2-0.3% depending on the country of use and also the side effects associated with tetrahydrocannabinol (THC).

On the basis of application, the CBD Patch market is segmented into chronic pain, anxiety, arthritis, elevate mood, neurological pain and others. In 2021, chronic pain segment is dominating the CBD Patch market due to the increase of cases of chronic pain such as neck pain, shoulder pain, etc and the high availability of patches in the pain relief application.

On the basis of source type, the CBD Patch market is segmented into natural and synthetic. In 2021, natural segment is dominating the CBD Patch market due to the trust of consumers on the natural products as plant based products are considered safe without any skin problems or allergies.

On the basis of end use, the CBD Patch market is segmented into homecare setting, research and development centers, hospital, clinics, rehab centers and others. In 2021, homecare setting segment is dominating the CBD Patch market as the CBD product utilization is not yet approved in the hospitals and clinics.

On the basis of distribution channel, the CBD Patch market is segmented into dispensaries & pharmacies, online and conventional stores. In 2021, dispensaries & pharmacies segment is dominating the CBD Patch market due to its presence and established supply chain from the manufacturer to consumer.

On the basis of countries, the CBD Patch market is segmented into U.K., Germany, France, Italy,

Switzerland, Spain, Belgium, Netherlands, Turkey, Russia and Rest of Europe. In 2021, U.K. is dominating the CBD Patch market due to its developed market and higher manufacturers in the country.
