Market Trends

The increasing prevalence of chronic lifestyle diseases, such as diabetes, high blood pressure, asthma, arthritis, cancer, stress-related disorders, etc., is among the primary factors driving the India health and wellness market. In addition to this, the sedentary lifestyles, hectic work schedules, and unhealthy food choices of consumers are further propelling the demand for health and wellness management services across the country. Moreover, the elevating adoption of various healthcare activities, including yoga, meditation, and athletics, is also positively

influencing the market growth. Apart from this, the growing number of mineral spas operators that use specialized therapeutic waters, such as iodine-bromine and Malkinskaya mineral water, to treat numerous cardiovascular and circulation disorders, asthma, bronchitis, etc., is anticipated to fuel the India health and wellness market over the forecasted period.

Note: We are regularly tracking the direct effect of COVID-19 on the market, along with the indirect influence of associated industries. These observations will be integrated into the report.
