

# BIO2022 will showcase the latest Bio Tech innovations from the worlds leader in technology. San Diego, CA, June, 13-16

SAN DIEGO, CALIFORNIA, USA, June 9, 2022 /EINPresswire.com/ -- Estonia realized science and technology were important for the future. The many innovations in technology were directly related to the countries investment in technology via public schools. You may remember the news when computer coding was a school directive for all student in 1st grade.

Because of this forward thinking Estonia has become the world's most advanced digital nation offering fertile ground for innovation across the biotech industry. Estonia's uniquely entrepreneurial environment, solid scientific and research foundation, and strongly interconnected scientific community provide the perfect backdrop for breakthroughs in biotech.

Join us, be a part of the revolution and see Estonia pushing boundaries at the 2022 BIO International Convention taking place in San Diego, CA from June 13 - 16, 2022.

Why meet just a company when you can meet a whole country of innovators pushing the biotech industry to new heights.

Meet Estonian Minister of Enterprise and Information Technology. Andres Sutt will join the panel on Monday, June 13th, 1pm - 2.30 pm: Spurring Biotech Innovation Across The Globe: A High-Level Discussion. Mr. Sutt will provide an overview of Estonia's Biotech industry, innovations, technology and partnering activities. Mr.Sutt will be at the Estonian booth #3023, 3pm-5pm to answer any questions.

Estonian Companies attending BIO 2022 :

Connected Health Cluster

Connected Health, founded by the Science Park Tehnopol, is a country-wide partnership

between health-related stakeholders in Estonia.

<https://connectedhealth.ee/>

Center of Food and Fermentation Technologies (TFTAK)

TFTAK is your ideal microbial consortia contract manufacturing partner. TFTAK is a trusted partner of world-leading companies in the field.

<https://tftak.eu/>

Icosagen Cell Factory

is an organically growing contract research, development and manufacturing organization (CRDMO) that invests all of its profit into the company's development. We develop therapeutic and diagnostic antibodies.

<https://www.icosagen.com/>

Solis BioDyne

Solis BioDyne is a world leader in the development of accurate room temperature stable reagents and enzymes. Over 26 years of experience in Industrial-scale protein design.

<https://solisbiodyne.com/>

IKO Science

IKO Science has invented unique IKO Biodetector BD500 that provides all the functions and technologies necessary for the efficient and accurate measurement/detection, in real time, of viruses and other organic aerosols, such as airborne bacteria, spores etc. inside objects where the concentration of bio-aerosols is strictly limited.
