# Energy Industry Veteran Mike Anderson Joins ikeGPS as Director of Enterprise Solutions for Utilities

*The hiring of another proven business developer and sales leader underscores IKE's investment in the electric utility market.*

BROOMFIELD, COLORADO, UNITED STATES, June 14, 2022 /EINPresswire.com/ -- IkeGPS, the leading provider of outside plant infrastructure data acquisition and analysis tools for electric utilities in the US, today announced that Mike Anderson has joined the company and will serve as Director of Enterprise Solutions for Utilities.

> Mike brings a tremendous amount of industry experience to our team at ikeGPS as we help power delivery utilities develop and implement grid hardening, grid resiliency, and grid reliability solutions."
> *Carl Almeter, Vice President of Utilities, ikeGPS*

Mr. Anderson brings over 20 years of sales experience to ikeGPS, most recently as the North American Business Development Manager for TE Connectivity where he engaged with utilities, consultants, scientists, and customers in helping to improve the reliability, resiliency, and safety of their power delivery systems.

Previously, Mr. Anderson was a mid-market sales manager at Red Hat Software where he led a team responsible for new company acquisition.

About his new role with ikeGPS, Mr. Anderson said, "I'm honored and humbled to be joining this fantastic team at this exciting time in the energy industry. IKE has a great reputation for delivering quality solutions to electric utilities to help them maintain and strengthen their outside plant assets, such as utility poles, power lines and attachments. I look forward to jumping in and helping utilities strengthen their grids."

The hiring comes as ikeGPS continues to expand its industry-leading suite of hardware and software tools that help electric utilities acquire and analyze data to help secure, maintain, and improve their outside plant infrastructure, which include the utility poles, wires, and other entities associated with the US electric grid's physical structure.

IkeGPS's Vice President of Utilities, Carl Almeter, said of Mr. Anderson's hiring, "Mike brings a

tremendous amount of industry experience to our team at ikeGPS as we help power delivery utilities' engineering and operations departments develop and implement grid hardening, grid resiliency and grid reliability solutions. He embodies what we look for in an IKE team member. We're excited to have him on board and know our customers are going to enjoy working with Mike to improve their outside plant infrastructure performance."
