

Deluge Valves Market Sales Are Estimated To Be Valued At US\$ 1.56 Bn In 2022

Deluge Valves Market Expanding Due to High Demand from Oil & Gas and Chemical Sectors: Persistence Market Research

NEW YORK CITY, NEW YORK, UNITED STATES, June 14, 2022

/EINPresswire.com/ -- [Deluge valve sales](#) are estimated to be valued at US\$ 1.56 Bn in 2022, with steady long-term projections, according to the latest insights by Persistence Market Research. The report estimates the market to expand by a value CAGR of 4% from 2022 to 2032. Increasing demand for firefighting valves from the oil & gas industry, chemicals storage plants, pharmaceutical industry, mining sector, and transportation infrastructure is driving market expansion.

Increasing government spending on infrastructural projects, the power, and energy sector, and transportation infrastructure, is expected to increase over the coming years, thereby boosting demand for fire suppression systems and their components. Changing standards and regulations for firefighting deluge valves and increased concerns about the security of property and life are further expected to bring favorable demand to the market for deluge valves.

Key Takeaways from Market Study

By release system, pneumatic release deluge valves are anticipated to witness prominent demand growth at 3.8% CAGR by volume during the forecast period of 2022 to 2032.

Among industrial applications, deluge valves with remote resetting functions are more prevalent. Several firms are concentrating on designing deluge valves that are lightweight and compact.

The water application segment is projected to expand at a CAGR of 3.8% by value.

By region, East Asia and South Asia Pacific are anticipated to witness substantial growth in the deluge valves market. Among these countries, sales of deluge valves in China, ASEAN countries, and India are expected to increase at a high CAGR in terms of volume.

By end use, the oil & gas industry and chemicals sectors, together, are estimated to hold a prominent volume share of 39.4% in 2022.

“Construction projects across several countries are fuel demand for deluge valves. Non-residential segments and expanding infrastructure projects are projected to drive market expansion. Besides, crucial rules for deluge valves in firefighting systems are likely to fuel market growth,” says a Persistence Market Research analyst.
