encountered regulatory restrictions targeting ingestible CBD products. Recent studies including these findings cited by US Hemp Roundtable (<https://hempsupporter.com/news/new-study-demonstrates-cbds-strong-safety-profile-amplifies-calls-for-fda-regulation>) indicate the tide is turning with attention to safety and minimal negative side effects associated with ingestible CBD products. While navigating through the complexity of an every-changing regulatory environment has been a challenge, Life Elements is confident in their blend of focused botanicals, clean ingredients, and targeted body system profiles to balance and support overall health from the inside out.

Martha Van Inwegen, President and Founder of Life Elements is excited to re-release her tinctures, emphasizing, “There are many products flooding the market using essential oils and/or

fillers to mask the bite of hemp extract. Our CBD Botanical Tinctures are blended with premium broad-spectrum and organic hemp-derived CBD in a very specific formula that combines our knowledge of active ingredients geared towards benefitting sleep, anxiety, and health, with a pleasing taste profile.”
