

mHealth Market Global Trends With Focus on North America, Europe, China, United State Regions

mHealth Market Size – USD 40.90 billion in 2019, mHealth Market Growth - CAGR of 32.8%, mHealth Industry trends – Rapid digitalization in the healthcare sector.

VANCOUVER, BC, CANADA, June 15, 2022 /EINPresswire.com/ -- The Global [mHealth Market](#) is

“

The growing infiltration for smartphone and internet connectivity in emerging nations is driving the growth of the market.”

Emergen Research

forecasted to be worth USD 361.67 Billion by 2027, according to a current analysis by Emergen Research. The mHealth market has experienced an increase in demand in the past couple of years, due to the surge in the prevalence of smartphones and the advent of advanced technologies in the medical industry. Digital health has emerged as a triumphant venture, attracting several organizations and industries from outside the healthcare domain.

Applications on mobile help people in managing their own health, have access to necessary information wherever and whenever required, and promote healthy living. These technologies are being rapidly adopted, which is promoting their development. The advent of advanced technologies has revolutionized the industry for healthcare. Increased investments in health start-ups have also gained momentum, which has further propelled the demand for the market. New entrants to the industry are coming up with innovative ideas to make these apps more customer-friendly and are trying to tap into ample growth opportunities.

Ineffective communication between doctors and patients is among the biggest cause of errors in the medical sector. mHealth mobile apps are held with these issues. They provide point-of-care tools in the devices and allow for effective communication, better clinical decision-making, and improve patient outcomes.

Key Players Profiled in the Report are:

mQure, AT&T, Allscripts Healthcare Solutions, Omron Healthcare Inc., Apple Inc., Samsung

Electronics Corporation, Bayer Healthcare, Philips Healthcare, Cardionet Inc., and LifeWatch AG, among others.

Some Key Highlights from the Report

In September 2020, The University of California and eight other digital health companies will receive approximately USD 23 million in federal funding. The funding is for the development of mHealth and telehealth platforms that address the SARS-COV-2 pandemic.

mHealth helps healthcare providers move seamlessly between patients without having to go back to a work station or office. The use of these apps among patients is estimated to grow at a CAGR of 32.9% during the forecast period.

Modern technology has helped in the development of methods and tools to enable people to stay in shape and also maintain a healthy lifestyle. With people becoming more aware of the benefits of exercise and diet, wearable technology and fitness apps are becoming highly popular. Wearable devices are forecast to grow at a CAGR of 32.5% during the forecast period.

There is a consequential increase in the number of diabetic patients across the globe, which is boosting the adoption of a remote monitoring app, such as Glooko, for patients who suffer from diabetes. Remote monitoring held a significant market share in the year 2019.

The recently developed mHealth is the most effective and globally accepted technology that aids patients across the world, especially in the Asia Pacific region. Unchecked population in China and India and an increase in the geriatric population in countries such as Japan and Singapore are factors influencing the market.

Regional Outlook (Revenue, USD Billion; 2017-2027)

North America

U.S.

Canada

Europe

Germany

U.K.

France

Benelux

Rest of Europe

Asia Pacific

China

Japan

South Korea

Rest of APAC

Latin America

Brazil

Rest of LATAM

Middle East & Africa

Saudi Arabia

UAE

Rest of MEA

Key Benefits of Buying the Global mHealth Report:

Comprehensive analysis of the changing competitive landscape

Assists in decision making processes for the businesses along with detailed strategic planning methodologies

The report offers an 8-year forecast and assessment of the Global mHealth Market

Helps in understanding the key product segments and their estimated growth rate

In-depth analysis of market drivers, restraints, trends, and opportunities

Comprehensive regional analysis of the Global mHealth Market

Extensive profiling of the key stakeholders of the business sphere

Detailed analysis of the factors influencing the growth of the Global mHealth Market
