The shipbuilding and repairing market consists of sales of ships and shipbuilding and repairing services and related services by entities (organizations, sole traders, and partnerships) that operate shipyards. Shipyards are fixed facilities with drydocks and fabrication equipment capable of building a ship, defined as watercraft typically suitable or intended for other than personal or recreational use. The activities of shipyards include the construction of ships, their repair, conversion, and alteration, the production of the prefabricated ship and barge sections, and specialized services, such as ship scaling.

Global Shipbuilding And Repairing Market Trends

Shipbuilding companies around the world are increasingly using green shipbuilding technologies to comply with environmental rules and regulations. Technologies being used for shipbuilding include ships with no ballast systems that block organisms entering the ship and eliminate the

need for sterilization equipment, sulfur scrubber systems, waste heat recovery systems, speed nozzles, exhaust gas recirculation systems, advanced rudder and propeller systems, fuel and solar cell propulsion systems and use of LNG fuels for propulsion and auxiliary engines. Ships built using these technologies have significant energy savings and low carbon emissions.

Global Shipbuilding And Repairing Market Segments

The global shipbuilding and repairing market is segmented:

By Type: Shipbuilding, Ship Repairing

By Application: General Services, Dockage, Hull Part, Engine Parts, Electric Works, Auxiliary Services

By End-User: Transport Companies, Military, Others

By Geography: The global shipbuilding and repairing market is segmented into North America, South America, Asia-Pacific, Eastern Europe, Western Europe, Middle East and Africa. Among these regions, Asia-Pacific accounts for the largest share.
