The global connected cars market consists of sales of connected cars and related services. Connected cars are cars empowered with internet access and a local area network that helps to communicate with other vehicles. These cars have a wide range of sensors that transmits and receives signals by the manufacturers in conjunction with the services to enhance the consumer experience with the real-time interaction of the vehicles. These cars can be connected with smartphones or other mobile phones and allow the driver to mechanically monitor the performance of the car.

Global Connected Cars Market Trends

Connected car companies are increasingly developing new technologies such as digital and autonomous technologies to increase their revenue and also to gain a competitive edge over their rivals.
