

New Data Ranks the Most Sustainable Cities in the United States

Leading travel insurance company, battleface, releases findings from its latest research on the most sustainable cities in the United States.

COLUMBUS, OHIO, USA, June 16, 2022 /EINPresswire.com/ -- Today, leading travel insurance company, [battleface](#), released findings from its latest research on the most sustainable cities in the United States. As travelers take to the roads and skies in droves this summer amidst an ongoing climate crisis, battleface wanted to highlight the cities taking the lead on sustainability measures.

Analyzing data related to carbon emissions, sustainable transport options, electric vehicle infrastructure, green space per city, and vegan options, the battleface team narrowed down the top 50 most sustainable cities in the U.S.

The top 10 cities in the rankings were spread across the country, geographically, with cities on both coasts, the midwest, and the mountain west. The number one city, Washington, D.C. scored particularly well on carbon emissions and sustainable transportation options for residents and visitors alike.

The entire interactive map and the full list of cities (and their rankings), alongside data sources and methodology can be viewed [here](#).
