People who abuse laxatives can be classified into four kinds, according to a study published in the National Center for Biotechnology Information (NCBI) in 2010. According to the same study, individuals suffering from eating disorders such as anorexia or bulimia make up the largest group, with a prevalence of abuse ranging from 10% to 60%. Laxatives are medications that aid in the relief of constipation or the emptying of the intestine. Some soften or loosen the stool, while others help with bowel movement by increasing the frequency with which the big colon contracts. It is sometimes used to cleanse bowel faeces during operations or surgery that involves the lower colon.
