For many students, attending an in-state college or university continues to provide tuition benefits. The cost advantages they receive from attending a school in their state may be the deciding factor in pursuing a college degree. The convenience of a school within driving distance also factors into costs by providing locals with commuting as an alternative to expensive on-campus housing.

"Students today want more value from their college choices, which is why choosing an in-state education continues to be attractive. Rising costs are a staple of daily news stories. We want to shift the focus off expensive out-of-state schools and onto the best in-state schools each state has to offer its students," says Dr. Jed Macosko, academic director of AcademicInfluence.com and professor of physics at Wake Forest University.
