The disposable hospital supplies market consists of the sale of disposable hospital supplies and related services. Disposable hospital supplies are products manufactured for single usage and include supplies such as face masks, gowns, and gloves among others.

Global [Disposable Hospital Supplies Market Trends](#)

According to the disposable hospital supplies market research, the increase in production capacities by various players amid coronavirus outbreaks is a leading trend shaping the growth of the industry. For instance, on 15th May 2020, Honeywell announced plans to build a new production line in Scotland, UK with the capacity of producing 4.5 million FFP3 and FFP2 disposable face masks every month. These masks are likely to assist the UK government's response to the COVID-19 outbreak. Thus, the expansion of production capacities to meet the increased demand for disposable medical supplies is projected to generate higher revenues for the market during 2020.
