organic yeast market

The various types of yeast products that are available in the market are mostly process-resistant i.e., their composition does not get affected by processes such as acid, heat or freeze. This makes them appropriate for use in various applications and across various industries such as food, beverage, cosmetics and personal care, nutraceutical, pharmaceutical, and others.

In the food and beverage industry organic yeast is mainly used in applications such as soups, broths, fish, meat and analogue products and seasonings. Yeast autolysates are also used for flavoring purpose in food products for human and pets. These are also used as nutrient for microorganisms in fermentation process.
