

Helping David Among the Goliaths of the Food Industry

Online workshop to address growth opportunities for local food producers. Experts will examine SQF certification as a business building platform.

KATY, TX, UNITED STATES, June 20, 2022 /EINPresswire.com/ -- On July 21 DNV, a leading certification body for food, healthcare, transportation, and other vital industries, will host an online workshop to help smaller food companies use advanced food safety

standards to better compete on the domestic and international stage.

"Moving from GMP to SQF for Business Growth" will dive into the details of SQF certification and how it goes well beyond conventional best practices (GMPs) that smaller organizations typically

They want proof, not promises of your products food safety and quality."

Barbara Frencia, Business

Assurance CEO in DNV

rely upon to create safe products, satisfy customers, and manage risks on a local level.

"Succeeding in larger supply chains often dominated by huge companies and stringent regulations is a much different challenge," says Kathleen Wybourn, Director, Food & Beverage, NA, DNV Business Assurance USA Inc. "Certification to a trusted standard like SQF not only

improves your operations but generates confidence throughout the system. It opens doors as local companies look to scale up."

Ms. Wybourn and other experts will explain what's required to achieve SQF certification and how it supports an organization's growth initiatives; they will share valuable insights from companies that have gone through the process.

Why is SQF in the limelight right now?

Recently the US government unveiled a sweeping effort to expand competition, promote

organics and find new ways to make the food supply more resilient. The <u>USDA's Food System</u> <u>Transformation Program</u> significantly raises the stakes for all entities in the nation's food system; the program includes \$200 million specifically for food safety certification for specialty crops.

Existing market forces were already driving adoption of SQF and other certifications; increasingly it is a requirement, not an option, for conducting business on a larger scale.

"Bigger customers have bigger expectations," adds Barbara Frencia, Business Assurance CEO in DNV. "They want proof, not promises, that your products were produced within a structured framework of food safety and quality that is known and trusted by the industry at large."

SQF is particularly appealing to smaller operations as they cover the entire farm-to-table chain, including agriculture, manufacturing, packaging, distribution, retail and foodservice.

Representatives from DNV and SQFI will lead the discussion and be available to answer questions.

Event details:

When: Thursday, July 21, 2022

Hours: 11:00 a.m. to 12:00 p.m. CST

Registration is required but is free of charge
