The implantable infusion pumps market consists of sales of implantable infusion pumps and related services by entities (organizations, sole traders, and partnerships) that manufacture implantable infusion pumps. An implantable infusion pump is a small device that is put beneath the skin during the operation. The pump delivers the liquid pain medication to a different part of the body through a long, flexible tube called the catheter.

## [Global Implantable Infusion Pumps Market Trends](#)

Companies in the implantable infusion pump market are increasingly focusing on developing smart infusion pumps. The use of wireless technology in health monitoring devices is increasing, which enhances the ease of usage, connectivity, and data analysis. The integration of wireless technology allows the transfer of data from the device to a smartphone or a wireless device
