Baron Storm, Founder and creator of "THE AMAZING DIET" and author of the #1 best selling book of the same name, said the following when asked for comment:

"Most ice cream today is whipped to create a light, fluffy, air packed texture. For the most part, by the time they finish putting all the additives, artificial colouring and preservatives into it, it's more of a chemical mix than ice cream. AMAZING FOODS INC. is going back to the AMAZING "Old Fashioned" methods of creating ice cream. It's rich, flavourful, no air is whipped into it, and best of all it is healthy because of its probiotic function. Because of its probiotic function the ice cream assists the digestive system to generate the essential bacteria for a healthy colon and digestive tract. Ultimately this assists the body in building and strengthening the immune system." He states.

"There is no ice cream on the market today that competes with the taste and health benefits that our AMAZING ice cream delivers. Furthermore we have a surprise for all clients who order this ice cream. We cannot divulge what the surprise is right now but no one has ever done this with ice cream before." He added.

So stay tuned to more news releases that will update all readers.

The company is currently in the process of becoming a USA listed public company and news will be released shortly regarding this process.
