

Interventional Cardiology Devices Market 2022 | Key Findings, Company Profiles, Comprehensive Analysis, Top Players

Interventional Cardiology Devices Market Size – USD 13.72 Billion in 2020, Market Growth – at a CAGR of 8.7%, Market Trends – Advancements in technology

VANCOUER, BC, CANADA, June 20, 2022 /EINPresswire.com/ -- The global interventional cardiology devices market size is expected to reach USD 26.84 Billion at a steady CAGR of 8.7% in 2028, according to latest analysis by Emergen Research. Steady growth of the interventional cardiology devices market can be attributed to rising

incidence of cardiovascular diseases. Cardiovascular disease is the most common cause of death in the US, and is responsible for around 655,000 deaths every year. Coronary heart disease is the leading heart disease type that, in 2017, accounted for the deaths of 365,914 individuals in the US.

٢

Rising incidence of cardiovascular diseases and increasing geriatric population are significant factor driving global interventional cardiology devices market growth. " *Emergen Research* Key Interventional Cardiology Devices Market participants include Abbott Laboratories, Terumo Corporation, iVascular, Boston Scientific Corporation, Edwards Lifesciences Corporation, B.Braun Melsungen, Medtronic PLC, Koninklijke Philips NV, Biosensors International Group Ltd., and Endocor GmbH.

The research report on the Global Interventional Cardiology Devices Market is formulated with insightful data that will help the established companies and new entrants to analyze the

business trends and capitalize on investment strategies. The Interventional Cardiology Devices Market is analyzed with an aim to provide assistance to the readers to gain maximum returns on the investment and to enable an informed decision-making process.

Emergen Research follows a cohesive methodology to reduce the residual errors to a minimum level by refining the scope, validating through primary insights, and nurturing the in-house database on a regular basis. A dynamic model is formulated to capture the regular fluctuations in the market and thereby, being updated with any shifts in the market dynamics. The parameters and variables involved in the research vary depending on individual markets and most importantly, both demand and supply side information is included in the model to identify the market gap.

In June 2019, Terumo Corporation signed a partnership agreement with Orchestra BioMed, Inc. This partnership provides Terumo Corporation with exclusive rights for the development and marketing of Virtue Sirolimus-Eluting Balloon (SEB).

Angioplasty stents find application to restore blood flow occurring due to blockage and to reduce heart attack risk. Stents are considered beneficial in reducing damage caused to heart muscles in the event of a heart attack. Also, stents may instantly relieve or reduce symptoms comprising chest pain, fatigue, and shortness of breath.

Among the end-use segments, the hospitals segment accounted for largest revenue share in 2020, which can be attributed to robust presence of experienced healthcare professionals for

installation of interventional cardiology devices and more advanced and developed healthcare infrastructure, along with high purchasing power for advanced and dedicated interventional cardiology devices in countries in the region. Additionally, hospitals account for adverse event minimization in patients during critical procedures, including stent installation and cardiac catheterization.
