The ambulatory IV infusion pumps market consists of sales of ambulatory IV infusion pumps and related services by entities (organizations, sole traders, and partnerships) that manufacture ambulatory IV infusion pumps. Ambulatory IV infusion pumps are portable medical devices used for controlled delivery of medication into the patient's body. Only goods and services traded between entities or sold to end consumers are included.

Global [Ambulatory IV Infusion Pumps Market Trends](#)

Companies in the ambulatory IV infusion pump market are increasingly focusing on developing smart infusion pumps. The use of wireless technology in health monitoring devices is increasing, which enhances the ease of usage, connectivity, and data analysis. The integration of wireless technology allows the transfer of data from the device to a smartphone or a wireless device through Bluetooth or cellular connection for data processing and then to display the results, which can be used for further study and to check the health condition of the individual. Software platforms are being developed that allow patient monitoring and reduce human error.
