

North America Internet of Medical Things (IoMT) Market Size, Share, Trends, Key Manufacturers, Analysis & Growth

North America Internet of Medical Things (IoMT) Market By Component, Application and is expected to reach USD 49,889.21 million

NEW YORK, UNITED STATES, June 21, 2022 /EINPresswire.com/ -- [North America Internet of Medical Things \(IoMT\) market](#) is expected to gain market growth in the forecast period of 2021 to 2028. Data Bridge Market Research analyses that the market is growing with a CAGR of 22.2% in the forecast period of 2021 to 2028 and is expected to reach USD 49,889.21 million by 2028. The rise in the demand for real-time healthcare solutions across the globe act as a driver for the [Internet of Medical Things \(IoMT\)](#) software market growth.

North America Internet of Medical Things (IoMT) Market report execution is becoming very critical for the successful businesses as it provides insights into revenue growth and sustainability initiative. A dependable North America Internet of Medical Things (IoMT) Market report employs the use of latest tools and techniques for researching, analysing, and collecting data and information. The statistical and numerical data are represented in graphical format for a neat understanding of facts and figures of market research analysis. Furthermore, the superior North America Internet of Medical Things (IoMT) Market business report presents the data and information for actionable, most recent and real-time market insights which makes it easier to even take critical business decisions.

Key Market Competitors Covered in the Report

Siemens Healthcare GmbH
General Electric
Carre Technologies Inc. (Hexoskin)
Breathometer Inc.
BIOTRONIK
Medtronic
Meru Health
Boston Scientific Corporation
Hill-Rom Services, Inc.
Neurometrix, Inc.
Honeywell International Inc.
VitaConnect
EKso Bionics
BL Healthcare, Inc.
BioSerenity
Koninklijke Philips N.V.
Lenovo Healthcare Information Technology (Lenovo HIT)
AliveCor, Inc.
Health Care Originals

Internet of medical things (IoMT) is a combined infrastructure of medical devices, software applications, and health systems and services, which is swiftly transforming medical technology's role within health care. Internet of medical things is aiding the health care organizations to streamline their clinical, workflow management and expand their patient care from remote locations.

North America Internet of Medical Things (IoMT) market has developed as a result of technological advancements and increased accessibility to personal healthcare. On the other hand, the absence of infrastructure facilities and trained specialists in the hospital and medical sectors have hampered the market's expansion. A rise in the demand for connected devices in the healthcare sector is expected to create various opportunities for North America Internet of Medical Things (IoMT) market. This would tend to keep the future of the market strong and advanced.

The Internet of Medical Things (IoMT) market report provides details of market share, new developments, and product pipeline analysis, the impact of domestic and localized market players, analyses opportunities in terms of emerging revenue pockets, changes in market regulations, product approvals, strategic decisions, product launches, geographic expansions, and technological innovations in the market. To understand the analysis and the Internet of Medical Things (IoMT) market scenario contact Data Bridge Market Research for an Analyst Brief, our team will help you create a revenue impact solution to achieve your desired goal.

North America Internet of Medical Things (IoMT) Market Scope and Market Size

North America Internet of Medical Things (IoMT) market is segmented based on the component, platform, mode of service delivery, connectivity devices, application, and end-user. The growth among segments helps you analyze niche pockets of growth and strategies to approach the market and determine your core application areas and the difference in your target markets.

On the basis of components, North America Internet of Medical Things (IoMT) market is segmented into hardware, software, and services. Hardware is sub-segmented into processor, sensor, and others. Processors are sub-segmented into Microprocessor (MPU), Application Processor (AP), Microcontroller (MCU), and Digital Signal Processor (DSP). The sensor is sub-segmented into pressure sensor, temperature sensor, blood oxygen sensor, blood glucose sensor, Electrocardiogram (ECG) sensor, humidity sensor, image sensor, motion and position sensor, heart rate sensor, flow sensor, level sensor, and others. Software is sub-segmented into real-time streaming analytics, real-time monitoring, data management, network bandwidth management, security, and others. Data management is sub-segmented into patient data, product data, asset data, and others. Security is sub-segmented into identity access management, secure communications, data encryption and tokenization, distributed denial of service protection, and others. Services sub-segmented into professional services, and managed services. Professional services are sub-segmented into support and maintenance, deployment and integration, and consulting. In 2021, the hardware segment is expected to dominate the market as the increasing adoption of IoT enabled medical devices to meet the growing need for cost-effective and efficient solutions for delivering healthcare services. IoT-enabled medical devices play an important role in data gathering and tracking various activities leading to the development of various IoT in healthcare use cases.

On the basis of platform, North America Internet of Medical Things (IoMT) market is segmented into device management, application management, and cloud management. The device segment is sub-segmented into vital sign monitors, sleep monitoring devices, rehabilitation devices, and others. The vital sign monitor segment is sub-segmented into pulse oximeters, activity monitors, sprimonitor, heart rate monitors, electrocardiographs, blood pressure monitors, and others. The sleep monitoring devices are sub-segmented into wrist actigraphs, sleep trackers, polysomnographs, and others. The rehabilitation devices are sub-segmented into accelerometers, and sensing devices. The network management is sub-segmented into the server, Ethernet switch, and routing, gateway, storage, others. In 2021, the device management segment is expected to dominate the market owing to the advancements of wearable sensor devices, implanted sensor devices, and other stationary devices.

On the basis of mode of service delivery, North America Internet of Medical Things (IoMT) market is segmented into on-premise and cloud. In 2021, the on-premise segment is expected to dominate the market due to the wide usage of on-premises software as it doesn't require users to have an internet connection to access data. Though most businesses rely on the internet to conduct business, there's always a fear that the loss of a connection could harm productivity and make it impossible to access crucial data.

On the basis of connectivity devices, North America Internet of Medical Things (IoMT) market is segmented into wired and wireless. In 2021, the wired segment is expected to dominate the market as its adoption is increasing due to fewer attacks of network traffic interruptions, and less susceptibility to interference and outages than wireless access points.

On the basis of application, North America Internet of Medical Things (IoMT) market is segmented into on-body devices, healthcare providers, home-use medical devices, community, and others. The on-body devices are sub-segmented into consumer health wearables and clinical-grade wearables. The healthcare providers are sub-segmented into inventory management, personnel management, patient flow management, asset management, and environment monitoring. The home-use medical devices are sub-segmented into telehealth, remote patient monitoring, personal emergency response systems, and others. The community is sub-segmented into a kiosk, point-of-care devices, logistics, mobility services, and emergency response intelligence. In 2021, the on-body devices segment is expected to dominate the market with the surge in esthetic consciousness across the globe and advancements in the field of body contouring.

On the basis of end-user, North America Internet of Medical Things (IoMT) market is segmented into hospitals, clinics, research institutes & academics, homecare, and others. In 2021, the hospitals segment is expected to dominate the market owing to the increasing adoption of electronic health records (EHR) and remote patient monitoring systems.

On the basis of country, U.S. dominates the Internet of Medical Things (IoMT) market. This domination is due to the increased technological advancements and the formation of new startup companies.

North America Internet of Medical Things (IoMT) Market Country Level Analysis

The Internet of Medical Things (IoMT) market is analyzed and market size information is provided by the component, platform, mode of service delivery, connectivity devices, application, and end-user as referenced above.

The countries covered in the Internet of Medical Things (IoMT) market report are component, platforms, modes of service delivery, connectivity devices, application, and end-user. U.S. dominates the market due to the rising awareness about personal health amongst the population.

The country section of the report also provides individual market impacting factors and changes in regulation in the market domestically that impact the current and future trends of the market. Data points such as new sales, replacement sales, country demographics, regulatory acts, and import-export tariffs are some of the major pointers used to forecast the market scenario for individual countries. Also, the presence and availability of North America can brand and their challenges faced due to large or scarce competition from local and domestic brands, the impact of sales channels are considered while providing forecast analysis of the country data.

Rising Focus on Active Patient Engagement and Patient-Centric Care is boosting the Market Growth of North America Internet of Medical Things (IoMT) Market.

North America Internet of Medical Things (IoMT) market also provides you with a detailed market analysis for every country's growth in the particular market. Additionally, it provides detailed information regarding the market players' strategy and their geographical presence. The data is available for the historical period 2010 to 2019

Competitive Landscape and North America Internet of Medical Things (IoMT) Market Share Analysis

Internet of Medical Things (IoMT) market competitive landscape provides details by the competitor. Details included are company overview, company financials, revenue generated, market potential, investment in research and development, new market initiatives, production sites and facilities, company strengths and weaknesses, product launch, product trials pipelines, product approvals, patents, product width, and breadth, application dominance, technology lifeline curve. The above data points provided are only related to the company's focus related to the Internet of Medical Things (IoMT) market.

About Data Bridge Market Research, Private Ltd

Data Bridge Market Research Pvt Ltd is a multinational management consulting firm with offices in India and Canada. As an innovative and neoteric market analysis and advisory company with unmatched durability level and advanced approaches. We are committed to uncover the best consumer prospects and to foster useful knowledge for your company to succeed in the market.

Data Bridge Market Research is a result of sheer wisdom and practice that was conceived and built-in Pune in the year 2015. The company came into existence from the healthcare department with far fewer employees intending to cover the whole market while providing the best class analysis. Later, the company widened its departments, as well as expands their reach by opening a new office in Gurugram location in the year 2018, where a team of highly qualified personnel joins hands for the growth of the company. "Even in the tough times of COVID-19 where the Virus slowed down everything around the world, the dedicated Team of Data Bridge

Market Research worked round the clock to provide quality and support to our client base, which also tells about the excellence in our sleeve.”
