Data Bridge Market Research analyses the pack conveyors market will exhibit a CAGR of 6.50% for the forecast period of 2022-2029 and is likely to reach USD 13.91 billion by 2029.

The pack conveyors market is being driven by factors such as rapid urbanization and rising level of disposable income of consumers. In addition to this, the rising number of population will

expand the pack conveyors market. Furthermore, the increasing popularity of pack conveyors coupled with rising automation sector act as major factors influencing the growth of the pack conveyors market. Another significant factor that will cushion the pack conveyors market's growth rate is swift industrialization and globalization with rising economic developments. Also, booming manufacturing sector will further propel the market's growth rate during the forecast period of 2022-2029.

Some of the major players operating in the pack conveyors market are ContiTech AG, Vetromeccanica s.r.l., Microline S.r.l., Siemens, Emerson Electric Co., Vanderlande Industries B.V., FIVES, Daifuku Co., Ltd, SCHAEFER SYSTEMS INTERNATIONAL PVT LTD, Swisslog Holding AG, Taikisha Ltd., Dematic, Interroll Group, Shuttleworth LLC., Dorner Mfg. Moreover, increasing research activities for the development of technological advancement will create beneficial opportunities for the growth of the market. Additionally, surging demand from end-use industries such as healthcare, food and beverages, automotive and others will act as market driver and further boost new opportunities in the forecast period mentioned above.

However, high cost associated with the product will hamper the market's growth rate. Also, low adoption in developing economies and the prevalence of single unit of pelletisers and dividers will pose a challenge to the market. Other factors such as negative impact of COVID-19 on the supply chain and technical limitations will obstruct the market's growth.
