The ATM market consists of sales of ATM services and solutions by entities (organizations, sole traders, and partnerships) that is a specialized computer that makes it convenient to manage a bank account holder's funds. An automated teller machine (ATM) is a type of computerized banking terminal that allows consumers to conduct simple transactions without the assistance of a branch operator or teller. ATMs are convenient as they allow customers to do quick self-service operations such as deposits, cash withdrawals, bill payments, and account transfers. Customers can access banking 24/7 through ATMs.

Global ATM Market Trends

The introduction of Smart ATMs is a recent trend gaining popularity in the ATM market. Smart ATMs are automated teller machines (ATMs) that can do more than just disburse money. According to the ATM market forecast, smart ATMs allow for the implementation of cutting-edge technologies that improve the customer experience while also minimizing fraud. For example, in October 2021, Nations Trust Bank, a Sri-Lankan-based Bank, launched the first Smart ATM in Sri Lanka. The new machine is powered by technology and innovation to deliver a unique banking experience, allowing users to withdraw their preferred mix of currency notes to pay for bus or train tickets or eat at the MMC's restaurants. Commuters on the go will be able to save regularly used operations such as withdrawals, bill payments, and cash transfers as favorites, saving time
