The urinary incontinence and pelvic organ prolapse devices and equipment market consist of sales of urinary incontinence and pelvic organ prolapse devices and equipment and related services. Urinary incontinence (UI), also known as involuntary urination, is defined as an uncontrolled leakage of urine caused due to overactive bladder. Pelvic organ prolapse (POP) is caused because of the defects in the supporting structures of the vagina. Depending on the size and location of the defect, the functions of the organs contained within the female pelvis can alter their normal functioning.
