

Transit And Ground Passenger Transport Market Growth Rate Reaches 20% With The Introduction Of Hybrid Buses

The Business Research Company's Transit And Ground Passenger Transport Market 2022 - Opportunities And Strategies – Global Forecast To 2030

LONDON, GREATER LONDON, UK, June 22, 2022 /EINPresswire.com/ -- The transit and ground passenger transport providers are introducing hybrid buses to reduce carbon emissions. Buses are generally

powered using diesel which releases CO₂ emissions into the environment. On the contrary, hybrid buses utilize alternate fuel and do not require as heavy an investment as electric buses, to build an electric bus it costs around \$400,000. A hybrid bus is powered by two alternate fuels or fuel combined with electricity, diesel-natural gas, or diesel-electric. In addition, these buses offer a quieter experience and reduced maintenance costs, shaping the transit and ground passenger transport market outlook.

The global transit and ground passenger transport market size is expected to grow from \$265.48 billion in 2020 to \$649.15 billion in 2025 at a rate of 19.6%. The global transit and ground passenger transport market share is then expected to grow at a CAGR of 7.6% from 2025 and reach \$934.13 billion in 2030.

Going forward, the increasing global population will drive the transit and ground passenger transport market growth. The world population is growing and is expected to reach 10 billion by 2050. An increase in population creates more demand for transit transportation services including transit and ground passenger transport services. The rising population increases the demand for better schools, universities, government and private offices coupled by a better roads infrastructure due to the increasing need for mobility services. According to the transit and
