

# Europe Biostimulants Market 2021-2026: Trends, Growth, Size, Share and Future Scope

SHERIDAN, WYOMING, UNITED STATES, June 23, 2022 /EINPresswire.com/ -- According to the latest report by IMARC Group, titled "[Europe Biostimulants Market](#): Industry Trends, Share, Size, Growth, Opportunity and Forecast 2021-2026," the Europe biostimulants market is expected to continue its strong growth during the forecast period (2021-2026).

Europe Biostimulants Market Report

Biostimulants are defined as microbe-based agricultural chemicals that promote the organic growth of plants and minimize dependency on fertilizers. They are made with plant hormones, various active ingredients like humic and fulvic acids, seaweed extracts, amino acids, vitamins, trace elements, polysaccharides, microorganisms, etc. Biostimulants improve nutrient availability, environmental stress tolerance, plant metabolism and chlorophyll production, soil fertility, etc. As a result, they are widely used as safer alternatives to harmful agrochemicals.

As the novel coronavirus (COVID-19) crisis takes over the world, we are continuously tracking the changes in the markets, as well as the industry behaviours of the consumers globally and our estimates about the latest market trends and forecasts are being done after considering the impact of this pandemic.

## Europe Biostimulants Market Trends:

The expanding agriculture industry, along with escalating concerns towards soil sustainability and environmental safety, are primarily catalyzing the demand for biostimulants in Europe. Apart from this, the implementation of stringent regulations by the European Union (EU) to encourage organic farming practices and ensure ecological safety is further contributing to the market growth. Moreover, rising awareness among individuals towards the adverse health effects of chemically synthesized pesticides and fertilizers is also strengthening the regional market. Furthermore, growing food consumption levels and the declining availability of fertile

land areas are promoting their widespread adoption across European countries. Several other factors, such as continuous innovations and extensive research and development (R&D) activities in the field of agricultural sciences, will further continue to drive the biostimulants market growth in the region over the forecast period.

Europe Biostimulants Market 2021-2026 Analysis and Segmentation:

The report has segmented the market on the basis on country, product type, crop type, form, origin, distribution channel, application, end-user.

Breakup by Product Type:

Acid-based

Humic Acid

Fulvic Acid

Amino Acid

Extract-based

Seaweed Extract

Other Plant Extracts

Others

Microbial Soil Amendments

Chitin & Chitosan

Others

Breakup by Crop Type:

Cereals and Grains

Fruits and Vegetables

Turf and Ornamentals

Oilseeds and Pulses

Others

Breakup by Form:

Dry

Liquid

Breakup by Origin:

Natural  
Synthetic

Breakup by Distribution Channel:

Direct  
Indirect

Breakup by Application:

Foliar Treatment  
Soil Treatment  
Seed Treatment

Breakup by End-User:

Farmers  
Research Organizations  
Others

Breakup by Country:

Germany  
France  
United Kingdom  
Italy  
Spain  
Others

Key highlights of the report:

Market Performance (2015-2020)  
Market Outlook (2021-2026)  
Porter's Five Forces Analysis  
Market Drivers and Success Factors  
SWOT Analysis  
Value Chain  
Comprehensive Mapping of the Competitive Landscape

If you need specific information that is not currently within the scope of the report, we can provide it to you as a part of the customization.

If you want latest primary and secondary data (2021-2026) with Cost Module, Business Strategy, Distribution Channel, etc. Click request free sample report, published report will be delivered to you in PDF format via email within 24 to 48 hours of receiving full payment.
