Some Key Highlights from the Report

Within the cybersecurity market, the event of countermeasures is incredibly tough as a result of the shortage of standardization of cybersecurity solutions. The solutions for cybersecurity rely on the specifications given by the OEMs. These solutions vary because of the utilization of various platforms within the same vehicle model, variations within the electronic design, and totally different options within the vehicle. As a result, the automotive cybersecurity resolution suppliers face integration risks to affect threats and vulnerabilities of a vehicle.

Autonomous vehicles are gaining unprecedented quantity of traction. The expansion of autonomous vehicles offers unequalled opportunities to cloud suppliers, OEMs, and alternative industry stakeholders to collaborate and partner with automotive firms to leverage this growth. In order to develop self-service vehicles, there has been an agreement between the automobile manufacturer, Mercedes-Benz, and Uber Technologies INC. in 2017 which implies that autonomous vehicles is likely to be a reality shortly. The arrival of autonomous vehicles can increase cybersecurity threats and, hence, drive the automotive cyber security business.
