Dye sublimated apparel refers to the textiles created by printing specific quotations or embellishments on fabrics using the process of dye sublimation. Typically using high temperatures, the solid dye is converted directly into gas and then deposited onto the garment to create an irreversible bond with the fibers. The amount of dye pigments from a carrier film to a PVC printing surface is managed by thermal transfer. The major benefits of utilizing the process include premium output, resistance against cracking, peeling, and fading, and vibrant and permanent coloration. The most common dye sublimated apparels include t-shirts, pants, activewear, hats, and gloves.
