The healthcare IT integration market consists of sales of healthcare IT integration products and services by entities (organizations, sole traders, and partnerships) that help in integrating information technology (IT) into healthcare. It includes a variety of electronic methods used for systematic collection of real-time data of patients in digital format to create a healthcare ecosystem. Healthcare IT integration allows information such as patient's medical history, current treatment information, treatment plans, important dates for treatments, laboratory reports, test results, and other to be retrieved instantly and securely available by authorized users to improve the quality of healthcare.

[Global Healthcare IT Integration Market Trends](#)

According to the healthcare IT integration market analysis, technological advancement is the key trend being followed by the companies operating in the market. For instance, in 2021, Lyniate, an American-based healthcare IT integration developing company launched its new product, Lyniate Envoy with API technology from Datica Inc., which offers turnkey data exchange with any healthcare IT systems including Corepoint and Rhapsody. It also allows users to network with
