The boat building and repairing market consists of sales of boats and boat building and repairing services and related services by entities (organizations, sole traders, and partnerships) that operate shipyards or boatyards. Shipyards and boatyards are fixed facilities with drydocks and fabrication equipment capable of building boats, including dinghies, hovercrafts, motorboats, rowboats, yachts, sailboats, and inflatable rubber boats.

Global Boat Building And Repairing Market Trends

Boatbuilding companies are increasingly using 3D printing technology in the manufacture of boats. 3D printing involves the building of three-dimensional objects using a digital model by laying successive layers of material. 3D printing provides boat manufacturers with advantages such as adjustability, cost reduction, and convenience. Manufacturing companies are focusing on new products, especially for fishing and water sports. Many high-end yachts are already using 3D printed parts.
