The mobile healthcare market consists of sales of mobile healthcare products and related services by entities (organizations, sole traders, and partnerships) which provide mobile healthcare. Mobile healthcare is a branch of electronic health, which is defined as public and medical health practice supported by mobile devices. These devices are utilized for collection and storage of patient information to obtain accurate results, which are used to diagnose and treat various medical conditions.

Cloud based mobile health is the major trend gaining popularity in the mobile healthcare market. Cloud-based mobile healthcare uses cloud, mobile devices, such as mobile phones, tablet computers and personal digital assistants (PDAs), and wearable devices such as smart watches, for health services and data collection. According to the mobile healthcare market analysis, cloud-based systems offer flexibility and reduced cost compared to traditional servers. Using cloud, patient information can be accessed by doctors from any location. Major players in cloud computing such as Amazon, Microsoft, and Google, also operate in the mHealth space. In June 2020, Chronometriq, a US-based leader in healthcare management, released MagicSeat, a
