

# Retort Packaging Market Predicted to Accelerate the Growth by 2031

*Retort Packaging Market is expected to expand at a CAGR of 5.2% With valuation of US\$ 28.4 Bn by 2031.*

WILMINGTON, DELAWARE , USA, June 24, 2022

/EINPresswire.com/ -- Retort packaging, including pouches and trays, are gathering traction for the packaging of ready-to-eat meals and convenience food products. The use of retort packaging is growing for packaging of meat, seafood, soups, sauces, and desserts. Rise in consumption of convenience food is spurring the sales of products in the [retort packaging market](#). The global valuation is projected to advance at CAGR of 5.2% during the forecast period of 2021–2031.

Laminated retort pouches are widely being adopted as an advanced pouch packaging by food & beverages companies worldwide owing to their lightweight, durability, and high barrier properties. Key pouches used in end-use applications are stand-up pouches, back-seal quad, spouted pouches, and gusseted pouches.

The use of heat-resistant plastic materials such as thermoplastics has extended the avenue, find a TMR study on the retort packaging market. They are being preferred for packaging of ready-to-eat food products. Plastics accounts for a sizable share of nearly 76% in 2021 among all the materials used for retort packaging. Retort packaging have also generated significant attention among companies in the pet food packaging industry.
